

RAHUL KUMAR CHAUHAN

Python & Generative AI Engineer

+91 7355055909 | rahulkmch22@gmail.com | Gurugram, Haryana | [Linkedin](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Python & Generative AI Engineer with 4+ years of software engineering experience, building LLM-powered applications, RAG pipelines, Agentic AI systems, and business automation solutions. Experienced in organizational domain intelligence, lead generation, website data extraction, content automation, and campaign workflows. Strong in Python, Django, FastAPI, AWS, Linux, and modern GenAI technologies, with experience delivering solutions from development to production.

SKILLS

Gen AI : LLMs, RAG, Agentic AI, LangChain, LangGraph, CrewAI, Prompt Engineering
AI/ML: NLP, Machine Learning, Deep Learning, Embeddings, Semantic Search, Evaluation
Backend: Python, Django, FastAPI, REST APIs, SQL, MySQL
Cloud & DevOps: AWS, Linux, Docker, Git, CI/CD

WORK EXPERIENCE

Generative Ai Engineer | Freelancer Gurugram, Haryana *April 2026 – current*

- Working on business operation automation solutions to automate organizational workflows.
- Developed custom applications for organizational domain intelligence, domain classification, and lead extraction.
- Working on a content creation and campaign management application covering the workflow from data extraction to deployment, along with a Content Creator Intelligence System.

Python Developer | Sortstring Solutions LLP, Lucknow, UP *Sep 2023 – March 2026*

- Developed a Hybrid RAG (C-RAG) chatbot with general chatbot capabilities using LangGraph, short-term memory, long-term memory, and LangSmith for observability.
- Built a complete **Supply Chain Management System for the dairy industry**, including **Demand Management, Delivery Management, Dispatch Management, and Sales Force Automation (SFA)** modules, and maintained 100+ REST APIs and backend systems supporting downstream data and automation workflows for 3+ enterprise clients.
- Owned the complete software delivery lifecycle, including **requirement gathering, solution planning, effort estimation, task allocation, implementation, testing, client demonstrations, and production deployment**.
- Deployed and managed production applications on **AWS Cloud** using **Linux servers**, handling server configuration, application deployment, monitoring, troubleshooting, and release management.

Python Developer | Softfix Technologies OPC Pvt Ltd, Lucknow, UP *Feb 2022 – Sep 2023*

- Developed full-stack web applications across education, food delivery, ERP, CRM, and HRM domains using Python, Django, HTML, CSS, and JavaScript.
- Built a Tiffin Delivery Service with subscription management, real-time order tracking, and multi-vendor dashboards supporting 200+ daily orders.
