

RAHUL KUMAR CHAUHAN

Python & Django | Generative AI Engineer | LLM & Agentic Systems

+91 7355055909 | rahulkmch22@gmail.com | Lucknow, UP | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Generative AI Engineer with hands-on experience building multi-agent orchestration systems and RAG pipelines using LangChain, LangGraph, and CrewAI, backed by certifications in Gen AI to Agentic AI and NLP. Skilled in prompt engineering, vector database design, and integrating multiple LLM providers (Groq, Google Gemini, Hugging Face) into production-style applications. Combines a strong Python/backend engineering foundation with applied Generative AI project delivery, from architecture through deployment.

SKILLS

Gen AI / Agentic AI: LangChain, LangGraph, CrewAI, LLM APIs, Prompt Engineering, RAG, Multi-Agent Orchestration

Vector & Retrieval: ChromaDB (Vector Database), Sentence-Transformers, Semantic Search

LLM Providers: Groq, Google Gemini, Hugging Face

Backend & APIs: Python, FastAPI, Django, REST APIs, SQLite, MySQL

Cloud & Tools: AWS, Docker, Git,

WORK EXPERIENCE

AI/ML Engineer | Codebasics | Virtual Internship

8 weeks

- Completed an 8-week intensive internship delivering 2+ end-to-end AI/ML business projects across NLP, Deep Learning, and Generative AI.
- Accumulated 200+ hours of practical experience in model development, evaluation, deployment pipelines, and business stakeholder communication.

Senior Python Engineer | Sortstring Solutions LLP, Lucknow, UP Sep 2023 – Present

- Built and maintained 100+ REST APIs and backend systems that support downstream data and automation workflows for 3+ enterprise clients.
- Owned the complete software delivery lifecycle, including **requirement gathering**, solution planning, effort estimation, task allocation, implementation, testing, client demonstrations and production deployment.
- Deployed and managed production applications on **AWS Cloud** using **Linux servers**, handling server configuration, application deployment, monitoring, troubleshooting, and release management.

Python Developer | Softfix Technologies OPC Pvt Ltd, Lucknow, UP Feb 2022 – Sep 2023

- Developed full-stack web applications across education, food delivery, ERP, CRM, and HRM domains using Python, Django, HTML, CSS, and JavaScript — the backend foundation later extended into AI-powered systems.
- Built a Tiffin Delivery Service with subscription management, real-time order tracking, and multi-vendor dashboards supporting 200+ daily orders.

PROJECTS

Multi-Agent AI Customer Support Orchestrator | LangGraph, FastAPI, Streamlit, ChromaDB, Groq, Google Gemini, SQLite

- Built a multi-tiered customer support system using LangGraph for graph-based multi-agent orchestration, with specialized agents for Billing, Technical, and General support dynamically routed by query classification.
- Integrated RAG with ChromaDB for policy document search, human-in-the-loop (HITL) escalation, persistent memory via SQLite checkpointer, and dynamic LLM switching via environment configuration.

RAG Document Q&A Bot | Python, LangChain, Streamlit, FastAPI, ChromaDB, Sentence-Transformers, Groq, Google Gemini

- Built a production-ready RAG system for PDF/DOCX/TXT upload and natural language Q&A using sentence-transformers (all-MiniLM-L6-v2) for dense embeddings and ChromaDB for persistent vector storage.
- Supported Groq, Google Gemini, and Hugging Face via a dropdown toggle; included conversational memory, source citations, and drag-and-drop upload.

CERTIFICATIONS

- Gen AI to Agentic AI with Business Projects — Codebasics, Jan 2026
- Natural Language Processing (NLP) — Codebasics, Jan 2026
- Deep Learning: Beginner to Advanced — Codebasics, Jan 2026
- Master Machine Learning for Data Science — Codebasics, Jan 2026

EDUCATION

Master in Computer Application - Amity university online | Ongoing

Bachelor of Commerce — Jannayak Chandrashekhar University, Ballia, UP | Jun 2017 – May 2020
